

***iLite*[®] IFN beta 1a NAb positive control**

(REF: BM3251)

Description

iLite[®] IFN beta 1a NAb positive control is a polyclonal rabbit antibody with a neutralizing effect on IFN beta 1a and can be used together with *iLite*[®] Type I IFN Assay Ready Cells (BM3049).

Content

45 µL of *iLite*[®] IFN beta 1a NAb positive control diluted in RPMI 1640 with 10% heat inactivated fetal bovine serum (FBS) and 1% Penicillin Streptomycin.

Receipt and storage

Upon receipt confirm that adequate dry-ice is present and the reagent is frozen. Immediately transfer to -80°C storage (**do not store at any other temperature**).

Background

Interferon beta (IFNβ) is well established as first line therapy in relapsing/remitting multiple sclerosis. The occurrence of NAbs and binding antibodies (BAbs) to IFNβ has been widely reported. Subjects with NAbs have shown reduced response to treatment with IFNβ, having higher relapse rates, increased MRI activity and higher risk of disease progression. The frequencies and titers of NAbs vary depending on the preparation used, dose and frequency of administration and also the assay used to quantify them.

Application

The *iLite*[®] IFN beta 1a NAb positive control can be used as positive control for neutralizing antibodies against IFN when using *iLite* Type I IFN Assay Ready Cells (BM3049).

Application Notes for the following assay is available:

- Measurement of anti-IFN α or β antibodies (NAbs) (E-175-GB)

Precautions

- For research use only. This product is intended for professional laboratory research use only. The data and results originating from using the product should not be used either in diagnostic procedures or in human therapeutic applications.
- The product contains human/bovine serum and if human serum is analysed it should be handled as if capable of transmitting infectious agents.
- Residues of chemicals and preparations are generally considered as biohazardous waste, and should be inactivated prior to disposal by autoclaving or using bleach. All such materials should be disposed of in accordance with established safety procedures.

Propriety information

In accepting delivery of *iLite* Assay Ready Cells the recipient agrees not to sub-culture these cells, attempt to sub-culture them or to give them to a third party, and only to use them directly in assays. Biomonitor *iLite* cell-based products are covered by patents which are the property of Euro Diagnostica AB and any attempt to reproduce the delivered *iLite* Assay Ready Cells is an infringement of these patents.
