The organizers cordially invite you to the 4th Coral Gables Symposium to be held October 5-7, 2016 at Biltmore Hotel, Coral Gables, Miami, USA.

The Coral Gables Symposia provides delegates with an environment designed to foster the exchange of ideas, listen to presentations performed by world-renowned experts and engage in discussions concerning the field of immunogenicity of biopharmaceuticals; their development, regulation and clinical use.

This years’ Coral Gables Symposia will provide a unique forum for thought leaders to address the principal concerns regarding immunogenicity and the patient. In particular, how an understanding of the immune response to biopharmaceuticals can benefit the patient both in terms of optimizing therapy, mitigating side effects, and improving outcome.

Michael G. Tovey Ph. D.
Chair Coral Gables Symposia

Scientific Organizing Committee
Dr. Michael Tovey, INSERM, Chair
Dr. Shalini Gupta, Amgen
Dr. Susan Kirshner, FDA
Dr. Sebastian Spindeldreher, Novartis
Dr. Robin Thorpe, NIBSC

Hotel Arrangement
Please visit www.coralgablesymposium.com for more information on how to make your individual hotel reservation at the Biltmore Hotel.
**CORAL GABLES SYMPOSIUM**

5-7 October 2016

*Immunogenicity and the patient: The Future is Yours*

---

**Registration**

In order to preserve the unique atmosphere of the Coral Gables Symposia, the number of participants is strictly limited. Applicants are welcome to register on our website by following the button below.

*Applicants can also submit an abstract for selection as a poster or short oral presentation. Deadline 31 August.*

---

**Early bird registration fee**

$1395

(until June 30th. Thereafter $1695)

**Who should attend?**

Those in academia, industry, regulatory agencies and clinical practice, concerned with scientific, strategic and developmental issues covering immunogenicity assessment of biotherapeutics.

**Coral Gable Symposium 2016 provides a unique opportunity to:**

- Participate in informal discussions with thought leaders from academia, industry, regulatory agencies and clinical practice.
- Influence future approaches to the major challenges confronting those active in the field.

---

**Optional social event**

There will be a social event arranged like previous years, we will return with more information regarding this as soon as we have the details ready.
